

fleurs célestes | a flower essence oracle & tarot deck
By Claudia Amendola Alzraa of Seeking Celestial Grace & Awakened Little Souls

How to Use This Deck, Why Flower Essences, and What Are They, Really?

(Pieces of this introduction were first written on Substack and then were adjusted for publication for my spirit baby communication oracle deck - The Celestial Temple - and my Visions of Christ, channeled Ascended Master Jesus deck)

This spiritual project started as an oracle deck. I was 33 cards in, with a completely different layout and plan, when I suddenly remembered a deck I made in 2020: Botanical Grace Tarot.

This former deck came with a digital guidebook that included the botanical associations of every card (as I learned through the Lo Scarabo Tarot Compendium). I wrote about their herbal uses and shared card details and journal prompts. I suddenly decided that my original plan of 44 Flower Essence oracle cards was not enough: I would combine two worlds - oracle and tarot - and use my old guidebook as my new guide in the development of these cards.

So what follows is exactly that: 78 oracle cards with tarot associations, a flower essence with every card - whether influenced by the botanical association or selected by myself through individual research and my favourite reference text, *Flower Essences and Vibrational Healing* by Gurudas - and an indicated moon phase.

This deck, in essence (pun intended), is, first and foremost, an oracle deck - meant to help you select what flower essence you should work with in your spiritual practice. The moon phases are meant to assist with guiding timing, lunar work, creating an association with the wheel of the year, or amplifying introspective reflection. Paired with the tarot titles, this can be used in tandem with personal or professional tarot readings to gain greater spiritual direction and growth through flower essence recommendations, or pulled as its own tarot reading.

This mini guidebook is not really necessary; all the guidance you need is directly on the cards. All information following just adds greater layers to your personal study, and each card includes the original card meaning and journal prompts from my Botanical Grace Tarot, along with bonus card information as taken from my tarot deck, Celestial Smith Tarot. The journal prompts help you bond and understand the tarot cards - **not** the oracle aspect of the cards.

The lunar phases can be used as you feel called to use them. They can represent timing, how long to take a particular flower essence you are guided to use, or to better understand the overarching message of the cards (ie. full moon illuminates information, new moon

indicates shadow work, the waning and waxing moons indicate transition periods, etc.). And remember that you can take more than one flower essence at a time; only some blends may indicate that they should be taken alone.

So, *what are Flower Essences, really?*

Flower Essences are vibrational remedies made from the energetic imprint of flowers, typically preserved in water and alcohol (like brandy). Unlike essential oils, they contain no scent and are not made from plant material itself—they carry the energetic signature or spirit of the plant. This makes them especially aligned with spiritual and emotional healing, rather than physical symptoms.

Flower Essences are widely present in French Parapharmacies and were something I only became exposed to when living overseas. It almost feels as if the secrets of this gift are being hidden in North America, especially since so many of my clients learn about them for the first time through me.

Flower Essences are made using a process that captures the energetic imprint or vibration of a flower, not its physical components. Essentially:

- The flower is harvested - mindfully
- The flowers are placed in spring water and are either left there for several hours with the light of the sun/moon (“sun steeped”), or they’re boiled in the water to release their essence
- The flowers are removed and the water becomes what is called a “mother essence”; to prevent spoilage, it’s mixed with very little alcohol (usually brandy)

How do Flower Essences differ from Essential Oils?

The TLDR version: Flower Essences heal the soul while essential oils support the senses and body - but there is so much more to it!

- Flower Essences are vibrational remedies made from flower energy (no scent) vs. Essential Oils which are physical extracts distilled from plant material (aromatic influence)
- Flower Essences work on emotional, spiritual, and energetic layers vs. Essential Oils which work on physical and mental layers, often used in body care
- Flower Essences are taken internally or applied to energy centers (though ingestion is my favourite method because of the intensity at which it works) vs. Essential oils which are typically applied topically (with a carrier oil or lotion) or diffused for inhalation

- Flower Essences are non-allergenic, safe during pregnancy, and can be used by children; essential oils may cause skin reactions, are not safe during pregnancy and should only be used via diffusion for children

What are the key spiritual benefits of using Flower Essences?

Support During Ascension and Awakening - This is the most important benefit of all, and it's one I want to touch upon right away. The vibrational impact that you feel upon starting a Flower Essence remedy is profound, while still managing to keep you grounded as you navigate new stages of Ascension along your spiritual journey. During periods of spiritual acceleration or if you are suffering from Ascension symptoms, Flower Essences can ground your energy and stabilize your emotional state. They often act like gentle guides during transformation, helping you stay centered while integrating new frequencies. They open you up while subsequently keeping you shielded and safe. It's incredible.

Energy ReAlignment - Flower Essences can subtly align your vibration, your auric sphere, and your Chakras. I find they help get your energy centers spinning in-tune with the Universe and help with blocked energy throughout the body. This is especially useful if you're having trouble navigating anxiety, opening up your heart to forgiveness, or even conceiving, just to name a few benefits.

Connecting With Nature and Plant Consciousness - Our ancestors knew the secret: plants and stones hold energetic frequencies that can heal us and help us navigate our emotional journeys in ways nothing else can. Using Flower Essences helps you tap into this plant consciousness and connect and ground with Gaia. Many people report intuitive messages or healing dreams after consistent use - for me, it felt like what I imagine being high feels like (I don't and have never done drugs).

How would you recommend using them in spiritual practice?

For me, it's as simple as a twice-a-day two-week ritual of using the Flower Essence directly on or under my tongue at the same time, every day (usually first thing in the morning and night, as it opens you up to amazing dreams). Some people add them to water and then drink the water throughout the day. Others may pair their Flower Essence with a certain tarot or oracle deck - or pull - and use it as an extra tool for assisting the emotional alchemy of the reading you just had. And some folks anoint Chakra points directly, or even pick a different Flower Essence for every moon cycle.

How you use Flower Essences is up to you and what you feel drawn to, but I can guarantee you this: it will blow your mind and completely transform your spiritual practice in the most beautiful ways.

Anything you are looking to navigate, you'll probably find a Flower Essence to match it. In a world of quick fixes and loud remedies, Flower Essences offer a quiet and sacred revolution! They offer healing through their subtle presence and deep vibrational

resonance. When integrated into spiritual life, the shifts may not be dramatic but the results will certainly be profound.

The Minor Arcana gives insight into short-term timelines such as everyday life. The numbers on each of the court cards represent transitioning through the stages of growth, much like The Fool's Journey through the Major Arcana.

The Court Cards represent people or figures in your life - or are sometimes archetypes of yourself in the moment.

ACE signifies the beginning; the next cards speak to choices made and action taken, changes that occur, and then it culminates with the end of a cycle at the TEN. Each journey

through each Suit is very specific, and each number in the suit speaks to a central theme or focus (no matter which suit it is).
